BUSKRO · TABBERS & LABELERS

BK731 Labeller

High Speed, Inline Label Applicator

Suitable for labels from 1/2" to 7" in size, on a 3" core

APPLY UP TO 50,000 LABELS PER HOUR

Overview

The Buskro BK731 Labeller is designed to apply pressure sensitive labels onto mail pieces. The system offers full flexibility in its ability to apply labels onto mail pieces and other substrates. In keeping with Buskro's philosophy of ease of use, the Labelling head is designed with many innovative features. The Labelling head is controlled through software via an operator keypad that permits rapid selection of the number of labels dispensed and their placement positions. A unique label-sensing feature allows the operator to easily adjust the label pitch at a touch of a button.

- Ideal for integrating into a product line to apply labels for RFID, security, branding, and peel-off applications

Apply Labels with Precision and Versatility

The BK731 labeller runs at up to 350 ft/min, ideal for BUSKRO mailing and finishing lines. Its rugged design handles various label materials and sizes (½" x ½" to 5" x 7") on flat products like mailers, boxes, and cards. With precise placement at 35,000+ pcs/hour, it ensures tight tolerances. Add a BUSKRO print system for variable content after peeling.

Convenient Setup and Label Threading

Featuring a keypad for data entry, simple mechanism for easy threading and configuration, a rail mount system for quick label placement, and a peel-point assembly with integrated sensor for auto-sensing and thickness adjustment. Its responsive label drive with speed compensation ensures consistent placement throughout production.

The BK731 Labeller offers an intuitive setup for parameter entry, label dispense quantity selection, placement specification, and auto-calibration.

High Speed Labelling Applications

The BK731 Labeller seamlessly handles inline stamp application, brand and security label affixation on boxes, Post-It notes on mailers, scratch-off applications on plastic cards, RFID labels, and even intricate multi-layer peel-off labels. It is enclosed fully for safety, houses all controls and mechanical components, and is effortlessly mounted on convenient aluminum rails, ensuring portability.

LABELS PER HOUR	LINE SPEED	LABEL SIZES	LABEL CORE
up to 50,000	up to 350 ft/min	½" x ½" to 5" x 7"	3" core
