Redefining Inkjet Speed, Quality and Economics for Envelope Printing

The iJetColor 1275 Pro is the first of its kind. An industrial thermal inkjet printing system designed specifically for production environments. Its CMYK printbar combines durable printheads with low-cost, aqueous pigmented inks to deliver exceptional print quality, performance, and cost efficiency at offset print volumes. The all-in-one system combines a high-capacity jet press feeder and heavy-duty transport system with HP TIJ 4.0 printhead technology for high-precision, high-speed, full-color envelope printing.

Built for high-volume print & mail production. The 1275 Pro delivers richer black density and higher color saturation on uncoated papers, eliminating the traditional "muted inkjet color" associated with dye-based inks. Its DFE with Color-Managed RIP and PMS Color Matching Technology provides user-friendly operation with less skilled labor than offset, while minimizing make-ready waste for short runs and frequent changeovers. An Ultra-Reliable Feeding System with rotary vacuum pick-up allows #10 envelopes to run at speeds of up to 30,000 envelopes per hour for longer production runs.

Backed by dedicated iJetColor support and a comprehensive service program. The 1275 Pro delivers reliable, consistent color and production-ready performance. Whether you're looking to increase color impact, reduce labor requirements, minimize waste, or achieve greater efficiency in high-volume envelope production, the iJetColor 1275 Pro provides a powerful alternative to traditional offset presses and existing inkjet systems.

Features & Benefits:

- **Next Generation HP TIJ4.0 Thermal Inkjet Printbar**
  Imaging every envelope size up to 12.75"
- **Productive and Fast**
  Up to 30,000 #10 envelopes/hour for real offset volumes.
- **Color-Managed RIP and PMS Color Matching**
  Technology for brand and offset quality CMYK.
- **Industry leading Total Cost of Ownership**
  For offset volumes without the make ready waste.
- **Ultra-Reliable Feeding System**
  Built for high volume mailing production

The iJetAdvantage™ Plan – 'No Finger Pointing' Guarantee

An industry exclusive service and supply program that pays for itself year after year with savings on services and consumables for the lowest total cost of ownership.

iJetColor Wizard

Our Factory Trained Technical team focuses only on you and is available 24/7 and the iJetColor Wizard keeps every iJetColor customer up and printing with immediate access.

iJetColor Training & Certification Program

- Free for every customer with iJetAdvantage
- Live training every Friday
- Three total classes designed to build real, usable expertise
- Become iJetColor Certified upon completion

Color Match Technology
Printware Exclusive
iJetColor Flow2.0

Simplify production with PDF-based job management and achieve accurate, consistent CMYK color with Color Match Technology. Designed on a ultra fast platform for lighting speed precessing of variable data for maximum productivitiy .

Essential Spares

The HP 108mm long-life printhead delivers millions of impressions, backed by next-day replacement parts with iJetAdvantage.

iJetColor 1275 Pro Specifications

Space + Electrical Requirements	Length: 18' Width: 4' Easy, Single Operator Design 220v 30A, 110V 15A
Feed Size Envelopes	12" x 14"
Color Matrix	Up to 16.8 million available colors
Max Print Width	12.7"
Pre-Installed DFE + RIP	PDF Based with HS Variable data processing
Speed Envelopes	Up to 40 ips / 200 ft/min Up to 30,000 #10 envelopes/hour
Smart Exit Conveyor	Length: 8', holds up to 1,000 #10 envelopes with envelope stacker - job, output count and double feed detect for single operator for great ROI.
Resolution	1200 x 1200 dpi
