Buskro Bosch UV

LED-cured UV black for Buskro piezo print systems.

USE

Overview	Bosch pigmented UV ink in the 1-liter self-sealing bottle for Buskro Quantum and Apollo UV systems. Cures instantly under the LED lamp, so it holds on coated and glossy stock.
Best on	Coated and glossy paper, plastics, packaging board, uncoated paper.
Aqueous systems	Buskro aqueous (Harris) systems use a different ink. Tell us your print module and we match it.
Runs in	Buskro Quantum, Quantum 4C and Apollo UV print modules with the Trueflow ink system.

SPECIFICATIONS

Ink type	UV-curable ink, pigment colorant
Size	1 L black
Curing	LED curing for UV inks
