Straight Shooter

Feeders for mailing, printing and packaging

SA-5 Servo

SA-5 Servo Attaching Feeder

Precision attaching in a small package!

Finally, a compact, affordable attaching solution that fits your budget *AND* your transport.

The Straight Shooter SA-5 attaching feeder was designed to fit where other attaching feeders won't. Its small footprint and simple design allow you to use it on a wide variety of transport bases.

Servo technology offers precise positioning and the color touch screen gives the operator complete control of the job settings.

The SA-5 can attach 1 or 2 cards, magnets, or other media at speeds up to 25,000 per hour! (media dependent)

Utilizing our patented *Buckle Separation*™ technology, the SA-5 feeds a wide variety of materials easily and our re-positional feed belts offer unmatched flexibility!

One or two card attaching

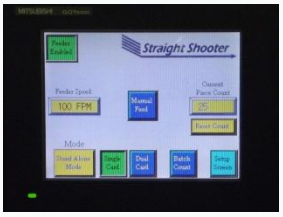
Batch counting for packaging

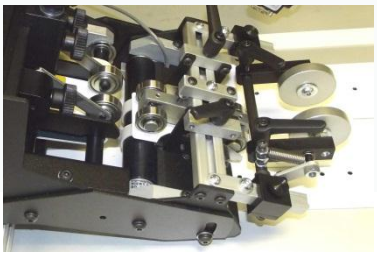
Turn-key package includes feeder, controller, touch screen, encoder and start photo!

Finally, an attaching feeder for the rest of us!

Straight Shooter is known for innovation and the SA-5 continues the tradition. Until now, servo attaching feeders have been oversized, complicated and EXPENSIVE! *Not the SA-5!*

The SA-5 is compact, easy to use and affordable. Now you don't have to be an engineer to handle attaching! Our color touch screen and patented features make precision attaching easier than ever.





Straight Shooter makes high speed attaching easier with these exclusive features:

*** Re-positional Feed Belts -- Lets you customize the feeder for every piece!**
*** Independently Adjustable Separators - Patented Buckle Separation reduces jams!**
*** Easy to service - ALL belts can be replaced in minutes!**
*** Compact size – Fits where others won't!**
*** Adjustable angle acceleration table**
*** Simple set up for 1 or 2 cards**
*** High speed batch counting**
*** Intuitive, easy to use**
*** Attaches dual cards as close together as you want!**

Turn-key package includes:

Color touch screen
High speed servo motor
Controller for servo system
Start and stop photo eyes
Encoder with wheel and bracket
Knock down roller assembly

Specifications

Media Handling:
Width: 2" minimum up to 5" maximum
Length: 2" minimum up to 12" maximum
Thickness: Single sheet up to ¼" thick
Speeds: Up to 25,000 single cards attached per hour
Placement accuracy: 1/8" plus or minus*
*Operator, media and transport dependent

Power:
120 vac, 5 amp standard, (240 optional)
Miss output standard. (used to stop transport base or host feeder on feeder out condition)

Dimensions: 8" wide x 17" long (excluding knock down rollers)
